SFB 1244 ...für die Welt von morgen

Advances on minimum energy/carbon
design and dynamic response control through
structural adaptation

A webex-lecture by

Gennaro Senatore

École Polytechnique Fédérale de Lausanne

Gennaro Senatore is a scientist and engineer specialized in computational structural mechanics and modern computer-aided design which includes algorithmic modelling, generative design and form-finding.

He is currently working as postdoctoral researcher at the Applied Computing and Mechanics Laboratory at École polytechnique fédérale de Lausanne
